

EASTON

EASTON TABLE SET

All Easton pieces are Exclusive By Design™.

KEYSHIELD® METAL FINISH

The trademarked KEYSHIELD® finish protects each piece of furniture from chipping, cracking, and UVA damage while providing unparalleled corrosion resistance. Steel products are finished with a two-coat powder coating process applied to a 7-15 mil thickness. Substrate preparation includes sandblasting to a white finish to remove all surface contaminants. The raw product then receives a corrosion-inhibiting phosphate coating prior to the application of the powder coating. The first coat applied to the substrate is zinc rich epoxy powder primer used exclusively on sandblasted parts. The second coat is a colored polyester powder coating. Both coats are electrostatically applied and oven cured according to powder coating manufacturing specifications to create a smooth, satin-like finish and a low-emitting non-porous armor.

SOME ASSEMBLY REQUIRED

The Easton table set with back is manufactured to provide ultimate stability and avoid damage during transit to the site. Minor assembly is required. Instructions are included with each shipment.

OPTIONS

Chairs are available with or without seat backs. Table top can be round or square, with or without umbrella hole. Larger sizes, additional chairs or ADA accessible options are available.

MATERIALS

Commercial-grade materials, 25% recycled raw steel, 100% recyclable steel and sustainable hardwood; table and seat tops must be bolted to legs during site installation; table: 11 gauge solid 40" table top bolted to 1/4" x 12" plate assembly welded to 2" schedule 40 pipe legs/table support; seats: 3/16" x 1-1/2" flat evenly-spaced seat slats with 1-1/4" od solid and 1/2" od solid frame; seat bolted to 1/4" x 10" plate assembly welded to 2" schedule 40 pipe legs/table support
